2 Temperature of an SS-Accretion Disk a.) Use the above expression for  $T_{\text{eff}}$  of an SS-disk to find the location (i.e., the radial distance from the central star) where the temperature is a maximum. Express your answer in terms of  $r_0$ , the radius of the inner edge of the disk. If the central star is a non-rotating black hole, then  $r_0 = 6R_g$ . In ...

An accretion disk is a structure (often a circumstellar disk) formed by diffused material in orbital motion around a massive central body. The central body is typically a star. ... the accretion disk of a black hole is hot enough to emit X-rays just outside the event horizon.

Foundations of Black Hole Accretion Disk Theory 5 1 Introduction Because of its firm connection to black holes themselves, black hole accretion disk theory belongs to the realm of fundamental physics. However, the theory itself employs a complicated maze of fluid-

Accretion Disks Black holes being what they are, something that falls into one disappears without a peep. It might therefore seem that accretion onto a black hole would release no energy. It isn't the case, however, and the reason has to do with angular momentum.
