Scope. Environmental Science: Processes & Impacts publishes high quality papers in all areas of the environmental chemical sciences, including chemistry of the air, water, soil and sediment. We welcome studies on the environmental fate and effects of anthropogenic and naturally occurring contaminants, both chemical and microbiological, as well as related natural element cycling processes.

Silver and Silver Compounds: Environmental Aspects (CICADS)

Chemistry is the scientific discipline involved with elements and compounds composed of atoms, molecules and ions: their composition, structure, properties, behavior and the changes they undergo during a reaction with other substances. In the scope of its subject, chemistry occupies an intermediate position between physics and biology. It is sometimes called the central science because it ...

Atmospheric chemistry is a branch of atmospheric science in which the chemistry of the Earth's atmosphere and that of other planets is studied. It is a multidisciplinary approach of research and draws on environmental chemistry, physics, meteorology, computer modeling, oceanography, geology and volcanology and other disciplines. Research is increasingly connected with other areas of study such ...

Carries water: Studies on water adsorption and transport on oxidized 2 D carbon materials have attracted increasing interest owing to their applications in various research fields such as sensing, energy conversion, and membrane separation. Herein, the recent progress on water adsorption and transport on oxidized 2 D carbon materials is reviewed, together with its application in proton ...
