

metaprogramming ruby 2 program pdf

Ruby is a dynamic, interpreted, reflective, object-oriented, general-purpose programming language. It was designed and developed in the mid-1990s by Yukihiro "Matz" Matsumoto in Japan.. According to the creator, Ruby was influenced by Perl, Smalltalk, Eiffel, Ada, and Lisp. It supports multiple programming paradigms, including functional, object-oriented, and imperative.

The Fibonacci sequence is a sequence F_n of natural numbers defined recursively: $F_0 = 0$ $F_1 = 1$ $F_n = F_{n-1} + F_{n-2}$, if $n > 1$. Task. Write a function to generate the n th Fibonacci number. Solutions can be iterative or recursive (though recursive solutions are generally considered too slow and are mostly used as an exercise in recursion).
