The Smart Grid (SG) is an emerging concept, which is in a testing phase in many countries. It is a relatively new perception that integrates electricity and communication on power system networks, which enable SG applications, mainly for the use of Renewable Energy Sources (RES).

### **Smart Grid and its future perspectives in Australia**

A smart grid is an electrical grid which includes a variety of operation and energy measures including smart meters, smart appliances, renewable energy resources, and energy efficient resources. Electronic power conditioning and control of the production and distribution of electricity are important aspects of the smart grid. Smart grid policy is organized in Europe as Smart Grid European ...
