In semiotics, linguistics, anthropology and philosophy of language, indexicality is the phenomenon of a sign pointing to (or indexing) some object in the context in which it occurs. A sign that signifies indexically is called an index or, in philosophy, an indexical.. The modern concept originates in the semiotic theory of Charles Sanders Peirce, in which indexicality is one of the three ...

Indexicality - Wikipedia

Ontology is the philosophical study of being. More broadly, it studies concepts that directly relate to being, in particular becoming, existence, reality, as well as the basic categories of being and their relations. Traditionally listed as a part of the major branch of philosophy known as metaphysics, ontology often deals with questions concerning what entities exist or may be said to exist ...

Phenomenology is the study of structures of consciousness as experienced from the first-person point of view. The central structure of an experience is its intentionality, its being directed toward something, as it is an experience of or about some object.

Phenomenology (Stanford Encyclopedia of Philosophy)

One of the most widely used assessments of domain-general creative cognition is the alternate uses divergent thinking task. In contrast to convergent thinking tasks, which involve discovering a single solution to a creative problem (e.g., insight 6, 7), divergent thinking involves generating several possible solutions to an open-ended problem, such as inventing creative uses for common objects.

Table 1: The four levels/modes of processing. Figures 3, 4, and 5 show how within the processing model, cognition depends upon context. The effectiveness of the contribution of processing activities at each of these levels / modes, depends on the cognitive requirements posed by the specific context.

JACQUES: (exuberantly) I present the source of homeland security reality as one dimension, ranging from objective to subjective. I describe the persistence of that reality as a second dimension, ranging from very stable to continuously changing. For my analytical convenience, I can then define homeland security as four ideal types: 24 a rational reality, 25 a structural reality, 26 a group ...
