

night low light photography pdf

Photography A tripod is an essential piece of equipment for quality results. A fast lens, allowing for wide open apertures, and image stabilisation are

Basic Principles of Night and Low Light Photography

light pixels appearing on dark regions of the photo. Dark regions of a photo show noise more plainly than lighter regions because the lightly colored noise sticks out on a dark background. This is of special concern to night photographers, because large portions of the image are often dark.

IMPROVE YOUR NIGHT PHOTOGRAPHY

Course Description: Using in class lectures and class outings, we learn technical information to make low-light and night images. Students will also read the text and have weekly assignments and a final project. There will be in class critiques of each in class, and homework assignments.

Syllabus: Night + Low-Light Photography

Night A little artificial light can go a long way...scene is predominantly illuminated by three street lamps 90 minutes after sunset, sun about 18 degrees below horizon, moon (80% full) about 50 degrees above horizon. ... Great source of illumination for night photography
