There are no medications specifically designed to target tics, although some antipsychotics (for example, pimozide) have been FDA-approved for treating Tourette's. Medications which are used as primary treatment in other conditions are used with some success in treating tics.

Treatment of Tourette syndrome - Wikipedia

Depending on the severity of your ADHD symptoms, you may be able to use nootropics as an alternative to prescription stimulants like Adderall, Ritalin, Vyvanse and their variations.. I experimented for a year by using nootropics in place of the 20 mg of Ritalin I had been using 3-times a day for several years.
