Diabetes nutrition therapy. Ideally, the individual with diabetes should be referred to a registered dietitian (RD) (or a similarly credentialed nutrition professional if outside of the U.S.) for nutrition therapy at or soon after diagnosis (11,14) and for ongoing follow-up. Another option for many people is referral to a comprehensive diabetes self-management education (DSME) program that ...

ACG Clinical Guideline: Nutrition Therapy in the Adult

Nutrition is the science that interprets the interaction of nutrients and other substances in food in relation to maintenance, growth, reproduction, health and disease of an organism. It includes food intake, absorption, assimilation, biosynthesis, catabolism, and excretion. The diet of an organism is what it eats, which is largely determined by the availability and palatability of foods.

Medical nutrition therapy (MNT) is important in preventing diabetes, managing existing diabetes, and preventing, or at least slowing, the rate of development of diabetes complications. It is, therefore, important at all levels of diabetes prevention (see Table 1). MNT is also an integral component of diabetes self-management education (or training).

Nutrition Recommendations and Interventions for Diabetes

CME, MOC and Meetings. Earn your CME from the convenience of your home or office by accessing ACG's web-based educational programs, or attend one of ACG's regional or national meetings and Annual Postgraduate Course, that provide an opportunity to connect with colleagues and discuss the challenges you face in practice and ways to overcome them.

Nutrition Therapy in the Adult Hospitalized Patient

Eating healthy to take charge of your health. Maintenance of general good health is very important for people with any chronic disorder: a well-balanced and planned diet will help achieve this goal.
