Ferroelectric polymers are a group of crystalline polar polymers that are also ferroelectric, meaning that they maintain a permanent electric polarization that can be reversed, or switched, in an external electric field.. Ferroelectric polymers, such as polyvinylidene fluoride (PVDF), are used in acoustic transducers and electromechanical actuators because of their inherent piezoelectric ...

A state of matter is also characterized by phase transitions. A phase transition indicates a change in structure and can be recognized by an abrupt change in properties.

Coal Transitions in Poland – a debate. How can the Polish coal sector meet Paris Agreement goals? Outcomes from our workshop in Katowice Prepared by IBS, previously posted on www.ibs.org.pl – “What might be feasible, fair and consistent with the Paris Agreement (below 2°C) pathways look like?” – was the key question of the workshop on the Polish coal sector organised by Climate Strategies (CS ...

The critical temperature for superconductors is the temperature at which the electrical resistivity of a metal drops to zero. The transition is so sudden and complete that it appears to be a transition to a different phase of matter; this superconducting phase is described by the BCS theory. Several materials exhibit superconducting phase transitions at low temperatures.

1. Introduction. Many cities in the world seek to change their transport systems in favour of buses, trams, trains, cycling, and walking, as a result of increasing levels of local air pollution, emissions of greenhouse gases, accidents, and congestion (e.g., EC, 2011). Policy makers seem particularly keen to increase the

share of cyclists, as this transport mode incurs a wide range of benefits ...
