

php the complete reference pdf

PHP is a popular general-purpose scripting language that is especially suited to web development. Fast, flexible and pragmatic, PHP powers everything from your blog to the most popular websites in the world.

PHP: Hypertext Preprocessor

The PHP Manual is available online in a selection of languages. Please pick a language from the list below. More information about php.net URL shortcuts by visiting our URL howto page. Note, that many languages are just under translation, and the untranslated parts are still in English.

PHP: Documentation

I compiled this list of french/english verbs in 2005 to help me study French. When printed on two sides of a sheet of paper, I was able to fold it up and take it with me anywhere for quick reference.

French Verb List of 681 Most Common Verbs and Translations

What is FPDF? FPDF is a PHP class which allows to generate PDF files with pure PHP, that is to say without using the PDFlib library. F from FPDF stands for Free: you may use it for any kind of usage and modify it to suit your needs.

FPDF

The PDF Reader for the Connected World. Foxit Reader is the PDF Reader which enables you to become part of the connected world. Provide authors with comments on documents, be notified when new document versions become available, discuss interesting topics right in the document, or securely open protected documents.

Free PDF Reader & PDF Viewer Download | Foxit Software

In the example above, you see that you do not have to tell PHP which data type the variable is. PHP automatically converts the variable to the correct data type, depending on its value.

Reference is a relation between objects in which one object designates, or acts as a means by which to connect to or link to, another object. The first object in this relation is said to refer to the second object. It is called a name for the second object. The second object, the one to which the first object refers, is called the referent of the first object.
