The Journal of Physical Chemistry C (ACS Publications)

Definition of restraint: a device or medication that is used to restrict a patient's voluntary movement. Prevalence of physical restraints: up to 17% in acute care settings. Prevalence of chemical restraints: up to 34% psychotropic drug use in long term care facilities. Complications of restraints: include documented falls, decubitus ulcers, fractures, and death.

Chemical and physical restraint use in the older person

Physical science is a branch of natural science that studies non-living systems, in contrast to life science. It in turn has many branches, each referred to as a "physical science", together called the "physical sciences".

Outline of physical science - Wikipedia

The first step in solving a quantum chemical problem is usually solving the Schrödinger equation (or Dirac equation in relativistic quantum chemistry) with the electronic molecular Hamiltonian. This is called determining the electronic structure of the molecule.

Quantum chemistry - Wikipedia

From foundational science to new and novel research, discover our large collection of Physical Sciences and Engineering publications, covering a range of disciplines, from the theoretical to the applied.

1. INTRODUCTION. Thermoplastics and elastomers have outstanding resistance to a wide range of chemical reagents. The chemical resistance of plastic piping is basically a function of the thermoplastic material and the compounding components.
