

plant protoplasts and genetic pdf

Protoplast, from ancient Greek *πρωτοπλαστός* (*prōto-plastos*, "first-formed"), is a biological term proposed by Hanstein in 1880 to refer to the entire cell, excluding the cell wall, but currently has several definitions: . a plant, bacterial or fungal cell that had its cell wall completely or partially removed using either mechanical or enzymatic means.

Protoplast - Wikipedia

Plant tissue culture is a collection of techniques used to maintain or grow plant cells, tissues or organs under sterile conditions on a nutrient culture medium of known composition. Plant tissue culture is widely used to produce clones of a plant in a method known as micropropagation. Different techniques in plant tissue culture may offer certain advantages over traditional methods of ...

Plants develop unorganized cell masses like callus and tumors in response to various biotic and abiotic stimuli. Since the historical discovery that the combination of two growth-promoting hormones, auxin and cytokinin, induces callus from plant explants in vitro, this experimental system has been used extensively in both basic research and horticultural applications.

Plant Callus: Mechanisms of Induction and Repression

SUMMARY. In order to streamline the transfer of DNA into plant cells have developed different methods for genetic transformation in plants. These methods can be divided into two classes: indirect methods based on biological vectors known as, and direct methods based on physical and chemical elements.

1. INTRODUCTION - OVERVIEW - Biology as a science deals with the origin, history, process, and physical characteristics, of plants and animals: it includes botany, and zoology. A study of biology includes the study of the chemical basis of living organisms, DNA. Other related sciences include microbiology and organic chemistry.

Generally it is held that the hyphal wall contains cellulose. According to Mitchell and Sabar (1966) and Bartnicki-Garcia (1966), cellulose is a minority component or even lacking altogether. Monocha and Colvin (1968) also could not detect the presence of cellulose in the *Phythium* hyphal wall.
