In contemporary education, mathematics education is the practice of teaching and learning mathematics, along with the associated scholarly research.. Researchers in mathematics education are primarily concerned with the tools, methods and approaches that facilitate practice or the study of practice; however, mathematics education research, known on the continent of Europe as the didactics or ...

Descriptive knowledge, also declarative knowledge, propositional knowledge, or constative knowledge, is the type of knowledge that is, by its very nature, expressed in declarative sentences or indicative propositions. This distinguishes descriptive knowledge from what is commonly known as "knowing-how", or procedural knowledge (the knowledge of how, and especially how best, to perform some ...

Learning to talk, talking to learn by Robin Alexander From the now substantial body of research on language, learning and teaching there are several strands with which we should be particularly concerned.

Learning to talk, talking to learn by Robin Alexander

results is the general model . . . the process is shown as a cycle in which knowledge is used [creatively] to construct (create) works, and works are evaluated to build knowledge."

DESIGN SCIENCE RESEARCH IN INFORMATION SYSTEMS

We prove a strong maximum principle for Schrödinger operators defined on a class of fractal sets and their blowups without boundary. Our primary interest is in weaker regularity conditions than have previously appeared in the literature; in particular we permit both the fractal Laplacian and the potential to be Radon measures on the fractal.
