9.SHOP PRACTICES. Knowing about good electronic shop practices begins with introduction to the basic tools and test instruments used in electronic repair, production and troubleshooting. It continues with "hands-on" activity directed towards learning practical skills such as soldering and de-soldering and making connecting leads and cables.

The 555 timer IC is an integrated circuit (chip) used in a variety of timer, pulse generation, and oscillator applications. The 555 can be used to provide time delays, as an oscillator, and as a flip-flop element. Derivatives provide two or four timing circuits in one package. Introduced in 1972 by Signetics, the

555 is still in widespread use due to its low price, ease of use, and stability.

In the field of waste management, extended producer responsibility (EPR) is a strategy to add all of the environmental costs associated with a product throughout the product life cycle to the market price of that product. Extended producer responsibility legislation is a driving force behind the adoption of remanufacturing initiatives because it "focuses on the end-of-use treatment of consumer ...

Preface . This book is intended for use in the core electronics courses for undergraduate electrical and computer engineering majors. The book frequently takes the designer's point of view in discussing circuits, illustrates design with numerous examples, shows how to test circuit designs using SPICE, and provides numerous open-ended design problems with which students can practice.
