

principles of organ transplantation pdf

Organ transplantation is a medical procedure in which an organ is removed from one body and placed in the body of a recipient, to replace a damaged or missing organ. The donor and recipient may be at the same location, or organs may be transported from a donor site to another location. Organs and/or tissues that are transplanted within the same person's body are called autografts.

Organ transplantation - Wikipedia

Organ transplantation in China has taken place since the 1960s, and is one of the largest organ transplant programmes in the world, peaking at over 13,000 transplants a year in 2004. China is also involved in innovative transplant surgery such as face transplantation including bone.. Involuntary organ harvesting is illegal under Chinese law; though, under a 1984 regulation, it became legal to ...
