Iranian Journal of Science and Technology, Transaction A, Science (IJSTS) is devoted to original research articles of moderate length, in a broad spectrum of Biology, Chemistry, Geology, Mathematics, and Physics. To be publishable in IJSTS, a manuscript should address new and significant scientific research.

Computational geometry is a branch of computer science devoted to the study of algorithms which can be stated in terms of geometry. Some purely geometrical problems arise out of the study of computational geometric algorithms, and such problems are also considered to be part of computational geometry. While modern computational geometry is a recent development, it is one of the oldest fields of ...

A recurrent neural network (RNN) is a class of artificial neural network where connections between nodes form a directed graph along a sequence. This allows it to exhibit temporal dynamic behavior for a time sequence. Unlike feedforward neural networks, RNNs can use their internal state (memory) to process sequences of inputs. This makes them applicable to tasks such as unsegmented, connected ...

Transactions on Machine Learning and Artificial Intelligence is peer-reviewed open access online journal that provides a medium of the rapid publication of original research papers, review articles, book reviews and short communications covering all areas of machine learning and artificial Intelligence.

Transactions on Machine Learning and Artificial Intelligence

Written by renowned software engineers at some of the world's most innovative companies, ACM Case Studies provide an in-depth look at how software teams overcome specific challenges by implementing new technologies, adopting new practices, or a combination of both.

Instructions for Authors Types of Contributions Transactions on Games publishes letters, short papers, full papers and surveys. Letters typically comment on existing papers but may also present new research where the result may be concisely described. Letters are limited to 4 pages in the journal's two column format.. Full papers may be research articles, surveys, or tutorials.

The electricity that is expended in the process of mining Bitcoin has become a topic of heavy debate over the past few years. It is a process that makes Bitcoin extremely energy-hungry by design, as the currency requires a huge amount of hash calculations for its ultimate goal of processing financial transactions without intermediaries (peer-to-peer).

The paper reviews the application of deterministic-stochastic models in some areas of computational electromagnetics. Namely, in certain problems there is an uncertainty in the input data set as some properties of a system are partly or entirely unknown. Thus, a simple stochastic collocation (SC) method is used to determine relevant statistics about given responses.

Lindenmayer Systems, Fractals, and Plants originated as notes for the SIGGRAPH 1988 course Fractals: Introduction, basics, and applications. They were published, with minor editorial changes, as a book by Springer-Verlag, New York, in 1989, and reprinted in 1992.
