Malignant bone tumors There are many different kinds of primary bone cancer. They're namedâ€”based on the part of the bone or nearby tissue that's affected and the kind of cells forming the tumor. Some are quite rare. Osteosarcoma Osteosarcoma (also called osteogenic sarcoma) is the most common primary bone cancer. It starts in the bone cells.

About Bone Cancer - American Cancer Society

The approach to the radiographic diagnosis of bone tumors consists of analyzing the lesion in an organized fashion, with attention to the specific radiographic features of tumor location, margins, and zone of transition; periosteal reaction; mineralization; size and number of lesions; and presence of a soft-tissue component.
