notification for underground storage tanks north dakota department of health division of waste management - ust program sfn-10980 (rev: 02/2018) i. type of notification first amended closure ii.

**NOTIFICATION FOR UNDERGROUND STORAGE TANKS FOR STATE USE**

The Montana Integrated Waste Management Act (IWMA) establishes goals for waste reduction in the state through the development of a progressive approach to solid waste management. The IWMA's priorities for solid waste management are source reduction, reuse, recycling, and composting. Landfill disposal and incineration are the final options.

**Waste Management and Remediation Division Waste and**

Problems of underground storage of waste involve geology in its broadest sense, including hydrology, geochemistry, and geophysics. Wastes may be solid, liquid, or gaseous, and they may be chemically toxic or noxious, esthetically offensive, or radioactive.
