An urban heat island (UHI) is an urban area or metropolitan area that is significantly warmer than its surrounding rural areas due to human activities. The temperature difference usually is larger at night than during the day, and is most apparent when winds are weak. UHI is most noticeable during the summer and winter. The main cause of the urban heat island effect is from the modification of ...

A subculture is a group of people within a culture that differentiates itself from the parent culture to which it belongs, often maintaining some of its founding principles. Subcultures develop their own norms and values regarding cultural, political and sexual matters. Subcultures are part of society while keeping their specific characteristics intact.

1. Introduction. One of the largest risks to people living in urban areas in the developing world is a lack of improved water, sanitation and hygiene (WASH) provision. Access to water and sanitation is an important factor in determining social vulnerability to natural hazards, not only for meeting immediate needs, but also for the wider application of relevant disaster prevention .
