INTRODUCTION An understanding of soils, their development, properties, and use potential, is both fascinating and important. This book, which focuses on the soils of Pennsylvania, was written to pro-

An Introduction to SOILS OF PENNSYLVANIA

Hydraulic action is the erosion that occurs when the motion of water against a rock surface produces mechanical weathering. Most generally, it is the ability of moving water (flowing or waves) to dislodge and transport rock particles. Within this rubric are a number of specific erosional processes, including abrasion, attrition, corrosion, saltation, and scouring (downcutting).

The corrosion rate of the weathering steel is considerably lower than that of the standard carbon steel. In

spite of this, possible effects of corrosion losses on reliable service of the structure throughout the designed service life should be considered when designing the structures.

Design of Corrosion Allowances on Structures from

Carbon dioxide removal (CDR) refers to a number of technologies, the objective of which is the large-scale removal of carbon dioxide from the atmosphere. Among such technologies are bio-energy with carbon capture and storage, biochar, ocean fertilization, enhanced weathering, and direct air capture when combined with storage. CDR is a different approach than removing CO₂ from the stack ...
