New England Wetland Plants, Inc. | Native Grasses, Native

A wetland is a distinct ecosystem that is inundated by water, either permanently or seasonally, where oxygen-free processes prevail. The primary factor that distinguishes wetlands from other land forms or water bodies is the characteristic vegetation of aquatic plants, adapted to the unique hydric soil. Wetlands play a number of functions, including water purification, water storage, processing ...

It is our goal to meet all of our customers' needs. As a wholesale facility, supplying native plants for members of the nursery and restoration trade is Environmental Concern's focus, however, we recognize the value of connecting with our retail customers. Unfortunately we are unable to accommodate customers who visit our facility without an appointment.
