

wine with food pairing pdf

Wine and food matching is the process of pairing food dishes with wine to enhance the dining experience. In many cultures, wine has had a long history of being a staple at the dinner table and in some ways both the winemaking and culinary traditions of a region will have evolved together over the years. Rather than following a set of rules, local cuisines were paired simply with local wines.

Foodpairing, or the non-registered trademarked term food pairing, is a method for identifying which foods go well together from a flavor standpoint, while food combining identifies foods that match from a nutritional or digestive standpoint. The method is based on the principle that foods combine well with one another when they share key flavor components.

Unknown said.... Have noticed for years I cannot tolerate red wine even in small amounts. I needed to use

red wine in a recipe, and decided to have a glass or two. When my stomach ache started, I must have remembered reading about the histamine effect because I got the idea to pop an antihistamine...and within fifteen minutes, my red wine stomach ache disappeared.
